LifeSphere Clinical™

KEY BENEFITS

- Leverages industry standard practices and cognitive computing to efficiently automate core business processes
- Provides single access to all modules with single sign-on (SSO), enabling users to work within the platform without having to change systems
- Enriches site performance and site compliance by using historical data to continuously improve analysis, decision making and data quality
- Delivers key performance indicators and metrics from all core clinical applications
- Eliminates redundant processes, data entry, coding and reconciliation
- Highly interoperable and integrates with third-party systems, registries and information portals for data exchange
- Helps organizations realized a lowered, predictable TCO through multi-tenancy cloud deployment, which can have users up and running within weeks

Today's clinical development environment requires a level of integration that spans across critical departments and systems. Greater collaboration, improved data quality and business intelligence, tighter control over a clinical trials lifecycle, and ensured compliance are all essential elements for the timely delivery of safe, efficacious products to market.

LifeSphere Clinical™: Streamlining eClinical with a Unified Platform

LifeSphere Clinical is the multi-tenant cloud-based platform for clinical operations and clinical data management that offers an innovative, end-to-end approach for clinical development. Users have a unified platform comprised of ten mission-critical modules, all from a central portal with single sign-on (SSO). Each module leverages industry best practices and cognitive computing to efficiently automate core business processes. Holistic view to study data enables real-time reporting capabilities.

LifeSphere CTMS	Full-featured clinical trial management system (CTMS) for study start-up, planning, tracking, and controlling all tasks and activities related to the set-up, conduct and closeout of clinical trials
LifeSphere Investigator	Investigator site portal for improving collaboration with site and investigator, site compliance and quicker site activation process
LifeSphere SUSAR Reporting	Advanced reporting system for automating distribution and tracking of clinical safety reports to investigators
LifeSphere eTMF	Cloud-based electronic trial master file (eTMF) solution
LifeSphere Trial Disclosure	Clinical trial disclosure solution efficiently manages trial registration and reporting of results to public registries
LifeSphere Clinical Payments	Clinical trial payments solution for accurate and efficient payments management

LifeSphere EDC	Innovative electronic data capture solution fully integrated with IWRS/Supply, electronic patient reported outcomes (eCOA), and patient compliance modules
LifeSphere eCOA	Advanced mobile enabled electronic clinical outcome assessment system
LifeSphere RTSM	Integrated advanced randomization and trial supply management solution
LifeSphere Central Coding	Centralized medical coding and dictionary management

An Innovative Solution Suite for Today's eClinical Challenges

Here are specific ways that LifeSphere Clinical is designed to help clinical development teams succeed:

Rapid Deployment and Lower TCO

LifeSphere Clinical offers SaaS-enabled, pre-validated solutions on ArisGlobal's secure cloud platform, enabling quick deployment, lower total cost of ownership, easy upgrades, and inexpensive fine-tuning to facilitate quick reactions to changing regulations.

Optimized to Reflect Industry Standard Practices

LifeSphere Clinical's industry standard practices have been developed collaboratively, validated by customers, and implemented as out-of-the box features and functionalities to transform clinical development into a simpler, more intuitive process.

Designed for Improved Productivity and Ease of Use

LifeSphere Clinical is a unified platform offered with ArisGlobal solutions for EDC, CTMS, eTMF, trial disclosure, eCOA, RTSM, clinical payments, document management, and medical dictionary management to improve cross-functional process efficiencies, collaboration and control. The platform offers out-of-the-box integrations with third-party, industry leading, clinical solutions for faster deployment and implementation.

Intelligent, comprehensive business process automation enriches site performance and site compliance, which use historical data to continuously improve analysis, resulting in improved decision making and better data quality. Through the LifeSphere Clinical platform, clients can leverage risk-based monitoring to continually evaluate risks. The business process automation is applied to the Source Data Verification (SDV) planner, to ensure the study is complete, accurate, and verifiable. With LifeSphere Clinical, configurable, role-based workflows, security and other configuration options enable the intuitive user interface to be easily tailored for global, regional and affiliate participation, ensuring a successful enterprise-wide rollout.

Completely Mobile Enabled

ArisGlobal provides mobile applications, which include Site Monitoring, eCOA, and EDC, to improve the ease and execution of clinical programs. Future product releases will be based upon responsive design, enabling end users to access the system via their tool of choice; desktop PC, laptop computer, tablet, and/or mobile devices.

ABOUT ARISGLOBAL®

ArisGlobal is a visionary technology company that's transforming the way today's most successful life sciences companies develop breakthroughs and bring new products to market. The ArisGlobal LifeSphere™ cognitive technology platform integrates machine-learning capabilities to automate the core functions of the product lifecycle. Designed with deep expertise and a long-term perspective that spans more than 30 years, our cognitive platform delivers actionable insights, boosts efficiency, ensures compliance, and lowers total cost of ownership through multi-tenancy.

Headquartered in the United States, ArisGlobal has regional offices in Europe, India and Japan. For more information, visit arisglobal.com or follow ArisGlobal on LinkedIn and Twitter.
