

LifeSphere IDMP™

KEY BENEFITS

- Offers a structured technology-enabled approach and complete IDMP coverage that allows you to prepare in advance for all ELI iterations and global implementation
- Reduces manual intervention with integration with internal systems, unstructured documents and external systems like EU RMS, EU OMS and GiNAS SMS
- Improves data quality with support for terminology mapping across internal systems to IDMP vocabulary
- Insulates you from changing implementation specs and shifting timelines with pre-validated technology upgrades On the cloud
- Realize return on investments by generating a high quality IDMP compliant central product dictionary
- Grows as you grow - Configuration for adding regional fields and business rules — available with minimal validation time on our cloud
- Large and globally available team of regulatory, IDMP and technology advisory experts
- Lower your total cost of ownership by sharing the cost of technology and domain expertise with others

ArisGlobal proudly presents LifeSphere IDMP™ - a complete technology solution that seamlessly works in any technology environment of a life sciences company at any level of maturity in the IDMP journey. The LifeSphere IDMP solution helps to not just become compliant with IDMP Standards across the globe but also enables it to leverage IDMP-related investments for realizing multiple strategic business benefits.

As a hosted solution on our secure validated cloud, LifeSphere IDMP adapts over time to support your journey through the multiple phases of IDMP compliance and beyond, keeping you completely insulated from the changing regulations and timelines, increasing your compliance agility and minimizing your technology and expenditure risks. LifeSphere IDMP has an optimal mix of automated tools and workflow-controlled manual intervention for extraction, review, coding and cleansing of structured and unstructured data. The solution is built to share medicinal product information, increasing cross departmental process efficiency and gaining cross departmental buy-in. Available today with entire ISO IDMP Data Model and EU extensions out of the box — for sandbox evaluation, for IDMP data assessment pilots or for kick-starting the collection of unstructured IDMP data.

What is LifeSphere IDMP

ArisGlobal's LifeSphere IDMP solution delivers end-to-end capabilities:

- Assesses data quality and completeness during initial IDMP readiness assessment and data collection pilots
- Collects structured data from source systems via interfaces built using LifeSphere IDMP's Integration capabilities
- Connects to a Master Data Hub for sourcing IDMP relevant information into its IDMP Data Hub
- Extracts unstructured data from documents using LifeSphere IDMP's NLP/OCR capabilities
- Enables UI based review and augmentation of not just EU Iteration 1 fields, but all ISO IDMP fields and regional extensions
- Validates data against agency specific business rules and checking readiness for submission

- Manages and tracking the data collection, review and validation process through configurable workflows
- Generates and electronically submitting HL7 SPL file to agencies and managing acks, errors and IDMP IDs
- Shares IDMP compliant medicinal product information and IDs back to other departments, via reports or via system interfaces built through LifeSphere IDMP Integration capabilities

This platform is complimented with a comprehensive portfolio of services:

- IDMP Readiness Assessments and Data Governance Definition
- Target State Business Process Blueprinting
- End to end Solution Implementation
- Support services and advisory on EU IDMP implementation processes
- Initial data collection, extraction and migration services
- Support services for steady-state data collection, review, validation and e-submission
- Post-implementation Managed Services
- Consulting services for future EU iterations, global IDMP compliance and other IDMP aligned regulatory initiatives

The solution is available on our secure validated cloud that provides hosted infrastructure, applications as a service and automated technology upgrade with evolving regulations.

ABOUT ARISGLOBAL®

ArisGlobal is a visionary technology company that's transforming the way today's most successful life sciences companies develop breakthroughs and bring new products to market. The ArisGlobal LifeSphere™ cognitive technology platform integrates machine-learning capabilities to automate the core functions of the product lifecycle. Designed with deep expertise and a long-term perspective that spans more than 30 years, our cognitive platform delivers actionable insights, boosts efficiency, ensures compliance, and lowers total cost of ownership through multi-tenancy.

Headquartered in the United States, ArisGlobal has regional offices in Europe, India and Japan. For more information, visit arisglobal.com or follow ArisGlobal on LinkedIn and Twitter.
