LifeSphere Reporting and Analytics
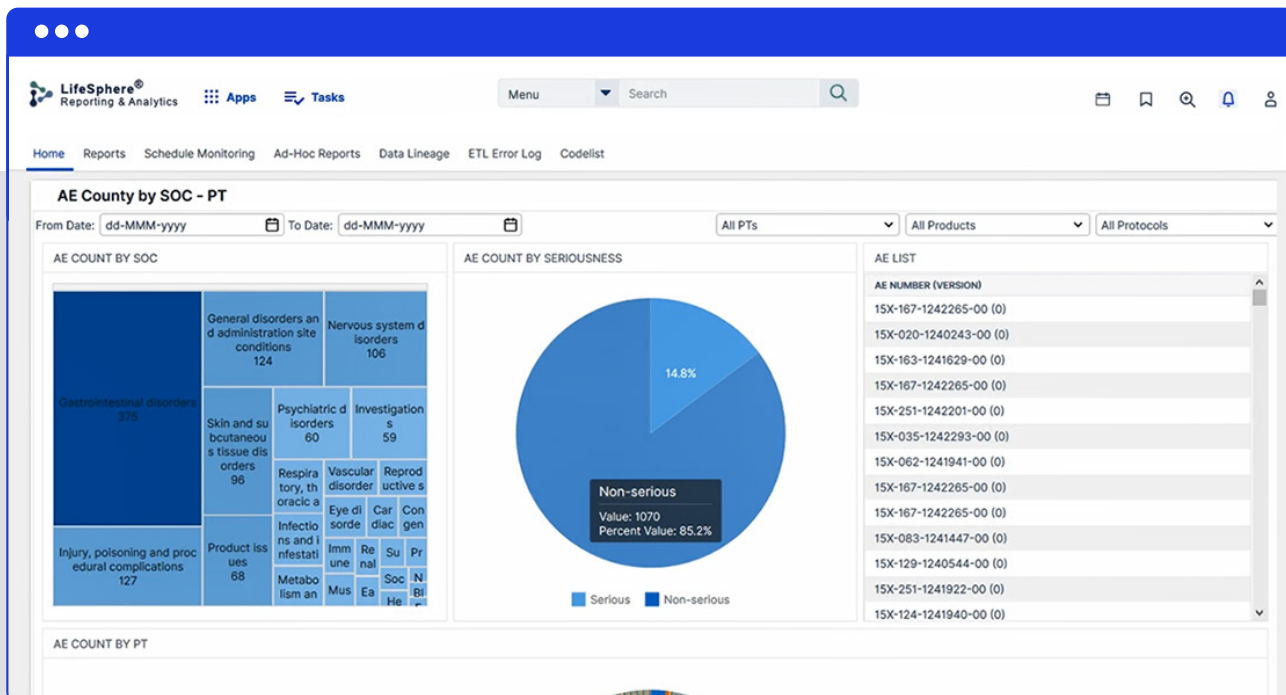

Delivering clarity into key operational and compliance metrics
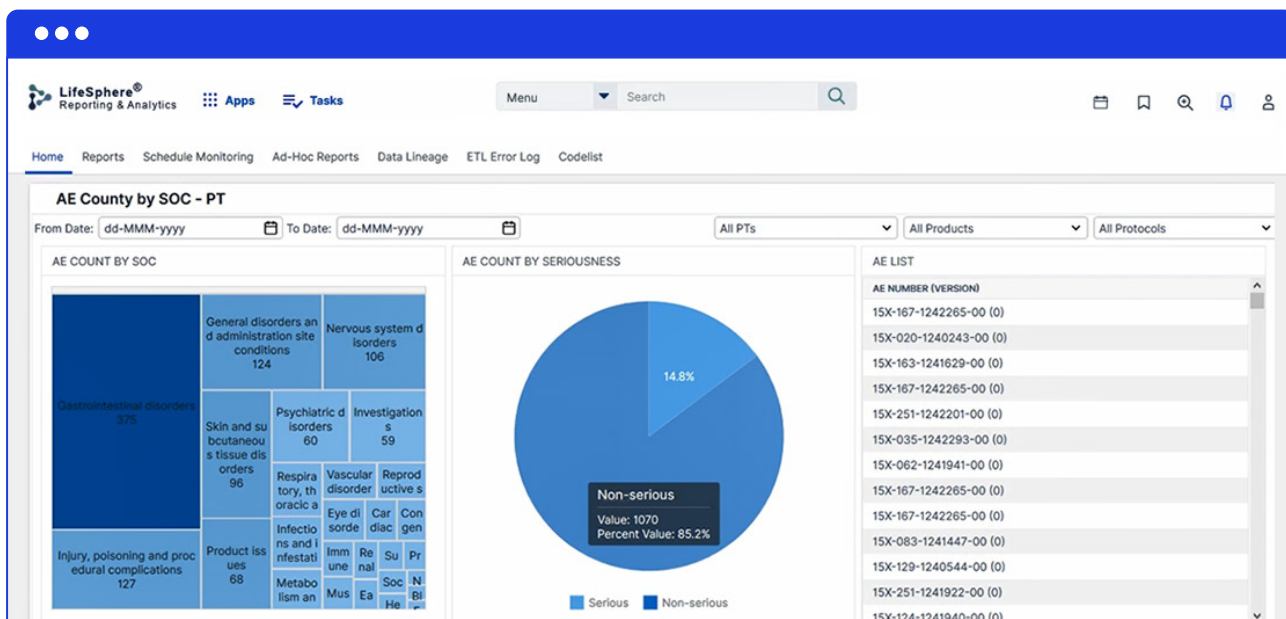

Next-Generation Safety Reporting

LifeSphere Reporting and Analytics is the premier solution for periodic and ad hoc safety reporting. Leverage out-of-the-box functionality to generate data listings, conduct analysis and gather business intelligence to meet all regulatory, operational and compliance reporting requirements.

Built to Meet the Reporting Needs of All Global PV Teams

- Scalable data warehouse platform for safety reporting and analytics
- Out-of-the-box reports for Regulatory, Health Authority, Compliance and Operational data
- Simplified report scheduling and distribution
- Easy ad hoc report generation for rapid insights
- Clean, intuitive user interface for ease of use
- Seamless integration with the LifeSphere Safety platform or third party systems

Harness Enterprise Safety Data

Integrate and aggregate enterprise-wide safety data from various sources, including affiliates, partners and operating units. Meet all key regulatory, operational and compliance reporting requirements with minimal manual intervention.

Powerful Reporting Capabilities

Extensive reporting capabilities, with over 50 pre-built, out-of-the-box reports. Users can also take advantage of an intuitive report builder to generate ad-hoc reports or leverage automated report scheduling and distribution.

Interactive Data Visualization

Simplify analysis with intuitive data visualization and a fully configurable dashboard to meet the requirements of specific users based on roles and responsibilities.

Seamless Integration

Integrates with LifeSphere Safety and third-party drug safety systems, while open architecture creates a one-stop platform for forecasting and optimizing case processing workload, improving global compliance and reducing safety update report (PSUR/DSUR) preparation and submission times.
