

# Solutions for Clinical Data Management

LifeSphere® EDC, eCOA, and RTSM make clinical data management intuitive and unified, delivering better outcomes. Faster.

## LifeSphere® EDC

LifeSphere EDC delivers sponsors and CROs a cost-effective way to capture, manage and report clinical data regardless of trial phase and complexity. Scale easily from one study to thousands and share data across the unified LifeSphere Clinical platform. Data management and reporting capabilities provide visibility into site performance across studies, allowing operators to make informed decisions using real-time study insights.

## Benefits

### Simplify

Combine disparate systems into a single unified database eliminating the need for costly integrations and reconciliation.

### Streamline Trials

Captures clinical data direct from site, eliminating the need for paper CRF and data entry.

### Work Faster

Reduce study development times and create seamless implementation of changes to live studies.

## Key Features

### Open Architecture

Open architecture supports seamless integration with any compatible CTMS, as well as out of the box integration with LifeSphere RTSM, allowing CRA's to plan and conduct monitoring activities more effectively.

### Flexible & Configurable Study Design

Advanced form designing, configurable workflows, and study design module that features a drag-and-drop wizard.

### Unified EDC and CTMS

Streamline study start-up activities while eliminating the need for costly integration and reconciliation.

### Easy Integration

Connects with existing systems via open architecture, leveraging API connectors and web services.

### Worry-Free Implementation

Fast, professional implementation teams adhere to industry best practices to get your teams up and running quickly.

DELIVERING RESULTS TO

COMPLIANCE WITH  
GLOBAL REGULATIONS

### LifeSphere® eCOA

Improves protocol compliance and data quality. LifeSphere eCOA is an intuitive and unified electronic clinical outcome assessment (eCOA) solution for patients to input data directly on their mobile device. A straightforward solution engaging patients, simplifying trials, and accelerating alerts through a streamlined clinical outcome assessment solution within a modern unified platform.

### Improve the patient experience

Empower patients with a direct voice in your clinical trial data, ensuring a better patient experience and more reliable insights for your development program.

### Simplify clinical trials

Eases patient acceptance of ePRO via use of familiar devices and an intuitive user interface. Capture, track and analyze clinical trials data remotely from any location.

### Accelerate alerts

Improve patient monitoring and safety through real-time reporting and provide automated alert notifications to patients.

### LifeSphere® RTSM

Real time supply chain visibility. LifeSphere RTSM is a comprehensive and configurable web-based clinical supply chain management system that automates the tracking of clinical trial supplies throughout the supply chain. Delivering efficiency, configurable technology, and reducing risk, end users can experience a comprehensive RTSM solution.

### Configurable technology

Completely configurable with pre-validated components so you can get your study started faster. Leverage configurable workflows and automated re-ordering functionality.

### Become more efficient

Delivers real-time visibility into the supply chain simplifying the change request and study design process.

### Reduce risk

Avoid supply stockouts or overages during clinical trials with dedicated randomizations, statistics, and supply chain teams.

## About ArisGlobal

ArisGlobal is the visionary technology company that's transforming the way today's most successful Life Sciences companies develop breakthroughs and bring new products to market. Our end-to-end life sciences platform, LifeSphere®, integrates our proprietary Nava® cognitive computing engine to automate all core drug development functions. Designed with a longterm perspective that spans more than 30 years, LifeSphere® boosts efficiency, ensures compliance, delivers actionable insights, and lowers total cost of ownership through multi-tenant architecture.

Headquartered in the United States, ArisGlobal has regional offices in Europe, India, Japan and China
