

Business Intelligence

Next-Generation Safety Insights, Right at Your Fingertips

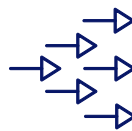

Business Intelligence provides a unified hub where users can access robust safety insights real-time to satisfy all their regulatory, operational, and compliance metric goals.

Key Benefits

One-Stop-Shop for Safety Intelligence

Establish a unified hub where your team can access complete safety data in real-time without leaving their native work environment.

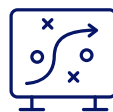

Accelerated Time-to-Insight

Make it simple for your teams to self-service the information they need via easy-to-use and highly customizable reporting and dashboarding tools.

More Efficient Compliance

Gain greater visibility into case management to proactively circumvent potential bottlenecks and risks that arise.

Enhanced Decision-Making

Unlock deeper, more robust safety insights through integrations with powerful analytics tools, intelligent automation, and benchmarking.

Deliver real value with Business Intelligence.

Contact Us Today

One Unified Environment

Bring safety data from diverse sources together in a central hub and access it in near real-time, without needing to rely on 3rd-party BI or analytics tools.

Unmatched Report Library

Access an extensive library of reusable global and local standard reports and dashboards, including standard aggregate reports and audit/inspection reports.

Flexible Ad Hoc Reporting

Build configurable reports and dashboards using a robust and easy-to-use query that provides support for a wide array of parameters and case series support.

Powerful Analytics

Leverage advanced dashboards and visualizations, AI-powered recommendations, and operational KPIs and industry benchmarks.

Intelligent User Interface

Take advantage of a best-in-class user interface that makes using key functionality intuitive and tailored to specific needs and roles.

Automated Workflows

Streamline workflows with built-in automation for report scheduling and distribution, notifications, and calendar and task management.
